FOREWORD OF REVISED EDITION

The MAYFLOWER INDEX is an expansion in a large degree of a plan used in a pamphlet compiled by the late Herbert Folger.

Pages 1-847 of Volumes I and II consisted of names of persons descended from a Mayflower Pilgrim and arranged in alphabetical order and numbered consecutively to the left of the name. On the right was given the parental number. So a short series of references reaches a Mayflower Pilgrim. Names of members of the General Society were in italics.

All names in Volumes I and II were taken from approved lineage on file with the General Society prior to February 10, 1931. Those in Volume III will include new names added up to January 1, 1960 including the first Richard More lines. New names contained in lineage papers to be filed later were to be included in supplementary volumes. Certain doubtful or disproven lines were to be omitted. This was the only practical of showing all proven Mayflower lines but in any system based on numbers human errors were bound to occur.

To carry out our pledge to publish a supplementary volume, Governor General Allen immediately after his election introduced and secured the adoption of a Resolution for such a Supplement, the full text of which will appear in Volume III.

After the funds were raised and I was appointed to carry out this project he and I discovered that the old supply of Volumes I and II was exhausted. Errors early discovered were shown in a correction pamphlet published in 1939. Very many more including errors in the correction pamphlet have been discovered by myself, by my sister, Lucinda B. Neff, and by painstaking work of the Secretary General, Mrs. F. E. deVries. Twelve more have been reported by E. H. Woodworth. The old correction pamphlet was difficult to use. So we are reprinting pages 1-847 showing the corrections data as to the names on the pages and lines where the names occur.

To illustrate the use of the corrected numbers, a typical illustration is given, that of Hon. Maurice H. Thatcher, former Governor of the Canal Zone and member of the Isthmus Canal Commission which built the Canal and long Congressman from the Louisville, Kentucky Congressional District.

In the use of Volumes I and II, complaint was made by users that without laboriously tracing a line back number after number it was impossible even to guess in which generation of the line such name belonged. So we have placed a star before each name which occurs in the first four generations. Mrs. F. E. deVries has in this part of the work given invaluable assistance and very painstaking work as well as in locating duplications and errors.

In the use of Volumes I and II complaint was also made that due to the system of placing alphabetically women who had married twice in the family of her first husband instead of in that of her maiden name, it was impossible to trace down as well as up and to determine from how many children lines had been proven. A typical case is that of 15,472-Grafton, Elizabeth (Maverick) m. Skinner, Thomas-parental no. 945. The parental number is that of Allerton, Remember m. Maverick, Moses. If we look alphabetically in the Maverick family to find what names have parental no. 945 and hence are her children, we do not find a daughter Elizabeth because she is listed in the Grafton family, the name of her first husband, Nathaniel Grafton from which marriage no lines had been approved. So we have shown some 300 such names at the bottom of the page where her maiden name belongs.

Also in Volumes I and II in cases where lines have been approved under both parents, the name was repeated and given an additional Mayflower number so that both parental numbers can be shown. In Vol. III we are in such cases showing both parental numbers on the same line after the name. In this Revised edition in cases where later proof has developed that both parents were of Mayflower blood we have placed both parental numbers after the name and on the same line with the other parental number. One person is one person and this more correctly shows the true situation. Thus some Vol. III Mayflower numbers will be shown as parental numbers in this revision. Also the names of many husbands or wives of persons who married after 1931 are shown as corrections and additions to the information first printed in Volumes I and II to save duplicating the name and render data upon that name as currently accurate as possible.

We also express our great appreciation to our Captain General, Col. Clement Kennedy for his assistance in securing clerical help.

PLAN

Part I of the Mayflower Index is arranged alphabetically and numbered consecutively. The number at the right of a name is the parent's number. Look for an ancestor's name in the alphabetical list. Note the number at the right. Find this number at the left of a name and you will find the ancestor's parent. For example:

No.	*Married*	*Name*	*Parent's No.*
33,918	Taft, William H.	Herron, Helen	33,912
33,912	Taft, Alphonso	Torrey, Louisa M.	33,917
33,917	Taft, Peter R	Howard, Sylvia	27,523
27,523	Rawson, Rhoda	Taft, Aaron	27,497
27,497	Rawson, Abner	Allen, Mary	17,293
17,293	Hayward, Elizabeth	Rawson, Edmond	23,773
23,773	Mitchell, Sarah	Hayward, John	8,594
8,594	Cooke, Jane	Mitchell, Experience	8,572
8,572	Cooke, FRANCIS, of the Mayflower.		

As earlier stated, many names on pages 1-847 are duplicated, and are given two successive numbers, due to the fact that only one parental number is shown after each name. As to whether the names represent the same person or two different persons who had spouses with identical names, can be readily determined by checking the parents indicated by each parental number.

Other duplications which are not so readily identified are as follows:

666 —35,333,4
3,917 — 3,918
4,185 — 4,634
4,469 — 4,507
